1. Pendahuluan

Web Service merupakan sistem yang digunakan untuk menyambungkan data dari Sistem yang dimiliki oleh Perguruan Tinggi ke Aplikasi Neo Feeder PDDIKTI. Pada versi terbaru Web Service terdapat beberapa pembaharuan, antara lain:

1. Web Service versi 2.0 dibuat dengan natural language / bahasa manusia.
2. Penggantian nama kolom pada tabel agar dapat lebih dikenal banyak orang
3. Output Web Service dibuat dengan dua model yaitu XML dan JSON
4. Fungsi yang ada pada WS disamakan dengan Feeder agar pengguna tidak mengalami kesulitan terhadap fungsi Web Service

2. Skema Interoperabilitas dengan Web Service

Gambar 2.1 Skema Interoperabilitas Neo Feeder

Pada gambar diatas PDDIKTI Feeder menyediakan service yang dapat dimanfaatkan oleh Perguruan Tinggi agar dapat melakukan interoperabilitas sistem informasi yang sudah berjalan di lingkungan perguruan tinggi masing-masing. Sumber data yang digunakan untuk memenuhi kebutuhan PDDIKTI bisa berasal dari sebuah system informasi atau multi-sistem informasi, dimana data yang berasal dari sistem-sistem tersebut perlu dilakukan mapping terlebih dahulu untuk disesuaikan dengan standar yang ditentukan PDDIKTI.

Gambar 2.2 Alur Pemanfaatan Data PDDIKTI

Pada skema alur pemanfaatan data PDDIKTI memungkinkan sistem informasi data perguruan tinggi menerima update terbaru dari PDDIKTI pusat.
